INTERNSHIPS

• INTERNEZY

Full Stack Web Development

Gained hands-on experience in Software Development, API Integration, Debugging, and Problem Solving while building responsive web applications using Bootstrap and Tailwind CSS, enhancing both technical expertise and professional growth.

• EL CODAMICS

Full Stack Web Development

Worked on real-world full-stack development tasks, including developing CRUD applications, integrating REST APIs, implementing authentication modules, and debugging application issues. Collaborated with cross-functional teams using GitHub in an Agile environment to build responsive web applications while applying software development best practices and theoretical knowledge.

PROJECTS

AI Career Coach Web Application

Developed a personalized AI career guidance platform using React.js, integrating Gemini API, Clerk authentication, and Neon DB with Prisma to analyze user data and generate career recommendations.

Ecommerce Website

Developed a dynamic online store using Laravel, JavaScript, and MySQL to manage products, users, and orders with responsive design.

Gym Bot

Developed a chatbot web app providing fitness and diet guidance using Python and JavaScript. Focused on backend logic, UI interaction, and user data management.
